Geo. Area General Charge	General Rural Area	SUIP*	1
Awatere Water Charge		SUIP*	1
Sounds Roads-Non Sounds		SUIP*	1

What effect does a revaluation have on rates?

With a District - wide revaluation there is no direct relationship between valuation movements and rates movements.

A revaluation of the District does not increase the Council's rating income, it does however redistribute the incidence of valuation based rates between individual ratepayers. This means that if the total Council levy was the same for the following year, some ratepayers may have rate increases, while others may have decreases.

Rates levied on a uniform charge basis(eg; refuse and recycling charges) are unaffected by a District - wide revaluation.

The only factors responsible for increasing rates on an individual property are:

- If an individual's property value increases by more than the average increase for their geographic rating area.
- If an individual's property value decreases by less than the average decrease for their geographic rating area.
- If an individual's property values alter as a result of new improvements being added(only affects any rates levied on a capital value basis e.g. Wairau Rivers Valley Works Rates, Kenepuru Road Rate).
- If the property changes its eligibility for separate service rates / charges(eg; it now qualifies for sewerage, refuse and recycling etc).
- If Council adds another set of charges for an additional dwelling on the property.
- If Council amends its Revenue and Financing Policy. Council amended its Revenue and Financing Policy in accordance with that proposed in its 2021 - 31 Long Term Plan Consultation Document.
- If Council increases its rating income requirement through the Annual Plan process.
