Dear Patrick,

I am the building consent officer managing your project.  
I have conducted a pre-acceptance vetting assessment and your application for building consent for **34 Carters Road** has now been accepted for lodgement.

This project is now part of my work schedule awaiting review.

You will be contacted soon to inform you of the application number.

Kind regards,

**Millie Blay**

**Building Consent Officer**

**Subject:** Re: Building Consent (Foundation re-level ) 34 Carters Road Aranui

Dear Patrick

Thank you for your information. Attached are the requested empty file containers for your consent documentation to be uploaded into.

The instruction guide on how to apply for a consent in Build Express has been attached. Please click the PDF file icon and select open to view. The instructions on how to format your documents and submit your application are located on page seven and continue to page fifteen.

The following documents need to be uploaded:

- application— including correct application form, check sheet, certificate of title and any sale and purchase agreements, together with a Licensed Building Practitioner Designer statement, if the application is for restricted building work
- specifications
- plans
- supporting documents

**Note:** The compulsory file fields (when superseding a document) have been set up specifically for your building consent. Please do not change these as any changes may result in a delay in processing.

**You may have noticed a change in the titles of the document placeholders. Please continue to upload your application documents to the appropriate placeholders.**

Other points to note:

- Application forms must contain a signature.
- All specification documents (each section), as well as supporting documents and plans, are to be bookmarked to reduce administration charges.

[Please feel free to contact us via Aconex if you have any further enquiries.](#)

Kind regards,

**Sandi Rhynd**

**Subject:** Building Consent (Foundation re-level ) 34 Carters Road Aranui

Address 34 Carters Road Aranui

Owner Details , Craig Williamson 021 2692394

Description of Work , Construction. Install jacking pads and jack off the existing concrete foundations wall back to level. Jack and pack internal piles.

4-5mm. There is a section of vaneer on the eastern side of the main entry that suffered in-plane displacement of approximately

with epoxy We recommend that this be replaced if it is particable to obtain matching bricks be realigned and mortor joints filled

patios injection resin and the repointing to match the existing. Makr good damage to walls, landscaping and external concrete

from the re-levelling.

PMO **Fletchers**

Claim number 2011-042891

Type **Building Consent**

Building and resource consent processing clock stops over Christmas

The Building Act 2004 and Resource Management Act 1991 stop the "working days" clock for consent processing during the Christmas period, which for this year is 20 December 2012 to 10 January 2013. This also includes the processing of Code Compliance Certificates. You can still submit applications via Aconex during this period, but normal processing timeframes will not commence until 11 January 2013
