

Maven

I believe the Jenkins & Taylor Reports definitely requires specific design and even recommends specific foundations i.e. driven piles

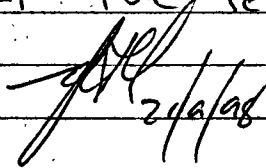

I can find no mention of shoring
But we definitely do need
to retain the section for specific
foundation design and fill

3.2 Foundations of the Jenkins and Taylor Reports that Section no 2 has been
subject to fill or pre load of
1.0 - 1.8 metres in depth

BCM.

21/9/98 Renard Foundation, Confirmed by phone 1000 with
Eugene that the reports are on file and action
taken
