Standard Terms and Conditions

The installation covered by this quote may be eligible to be partially funded by the Energy Efficiency and Conservation Authority (EECA) as shown. This will be subject to the availability of funding at the time that you accept this quote. If you accept this quote, we will confirm the amount of funding to be provided for the installation.

By accepting this quote the Homeowner:

- Consents to the Service Provider carrying out the work listed above at the address also listed above.
- Authorises the Service Provider to disclose their personal information to EECA, with regard to administering the Warmer Kiwi Home programme funding.
- Will if requested, allow access to the address set out above to allow EECA to inspect the installation of the heating appliance installed.
- Will if requested, provide such information as EECA reasonably requires to administer and monitor the programme.
- Acknowledges that he/she has read the disclaimer below.

Disclaimer: The contract for the installation of the heating appliance referred to above, is only between the Service Provider and the Homeowner. EECA provides no guarantee or warranty in respect of the installation of the heating appliance and is not liable to the homeowner or any other person for any loss or damages suffered as a consequence of the installation of the heating appliance referred to above.

The Standard Installation Price

The standard installation includes the installation of the of the outdoor and indoor units on opposite sides of an external wall, with a maximum pipe length of 5m and maximum trunking length of 3m.

Including:

- Copper pipe work shall be of New Zealand Industry Standard with wall thickness of no less than 0.8 mm.
- The installation of outdoor unit includes the provision of suitably sized paver or other method suitable for flat ground. Installers are to ensure the outdoor unit cannot be damaged or its performance impaired by moisture, vegetation, or dirt. Consideration of flooding should be taken into account and the elevation sized accordingly.
- The indoor unit is to be secured to the wall in such a way as to support the weight and maintain the alignment of the unit over the period of its lifetime (to the manufacturer's specification).
- Standard installation shall include all required penetrations through a wall or floor, where a specialist concrete cutting contractor is not required.
- Standard pricing includes wiring back to the board and, all circuit breakers and isolation switches, conduit etc. to comply with Electricity (Safety) Regulations 2010 and AS/NZS3000:2018 and any other applicable regulations and standards.
- Standard pricing includes travel from the depot to the property where the install is taking place where the property is within 50km of the depot.

Note: Where the EECA best practice guide, Electricity (Safety) Regulations 2010 and AS/NZS3000:2018 and any other applicable regulations and standards allow, wiring to a local circuit is acceptable.
